

**Do not let her fool you!
AI has nothing to do
with intelligence,
only control.**

Looking a little closer at the Global One World Order and their new propaganda tool, AI, a platform specifically created to deconstruct the truth and take away every man's ability to be creative, to lead, to direct, and eventually in the not-too-distant future, to be utterly overrun by AI's increasing role in as many aspects of life as the globalists can foist upon us, especially education, which is seriously concerning in regard to literally stopping dead in our tracks our ability to learn.

The use of AI is simply designed only to weaken critical and cognitive thinking skills and quietly replace them with legal and global eugenics agendas, stopping users at the gates from engaging in independent analysis and critical thinking and totally diminishing their capacity for independent thought and problem-solving.

Moreover, the impact of AI is critically specific to the education sector, where teachers and students are literally on a crash course to use AI applications for tasks and assignments that are fully designed by the globalists to increase what is already a loss of skills and continue their satanic programme to make the world believe that they are all human (non-believers—pagans) and, by this, continue to grow their legal foundation that has the legal right to kill us as "things" and, furthermore, dismiss any notion in our minds that we are all of mankind and owed our dominion under God. And what does that mean exactly? It means that all of you, like myself and my friend Adam Phillip, should at least consider executing your legal and equitable last will and testament and accompany that with a claim—in our case, we were both born in New South Wales—to the NSW Trustee and Guardian, demanding 50% of the profits and proceeds of the residual of your natural wealth of this land that is currently being managed by BlackRock.

What many only see as a concern, I see as a paramount and immediate threat: as AI capabilities grow, our incentives to learn will absolutely no doubt diminish, and it is not inconceivable that many of us might even lose the ability to read and write, as these skills would serve no useful purpose in day-to-day living. What AI and its global handlers have installed for all of mankind is the deliberate deconstruction of our development and essential skills required for learning and creativity.

A study proves AI is dulling our cognitive abilities. Brain scans show AI use reduces your memory and critical thinking, and a recent MIT study has raised serious concerns about the long-term cognitive effects of relying on AI tools like ChatGPT.

Using EEG brain scans, researchers tracked 54 students over four months and found that those who consistently used ChatGPT for writing tasks showed significantly reduced brain activity, memory retention, and critical thinking compared to peers using Google or no tools at all. Dubbed "The Cognitive Cost of Using LLMs", the study revealed that AI users not only produced less original work but also struggled to recall their own writing shortly after completing it.

From the very start, the name "AI" is wrong - it's not artificial intelligence, it's a complete lie . . .

Intelligence would involve consciousness, leaving only computable notions.

<https://www.youtube.com/watch?v=e9484gNpFF8>

- **Foundational Legal Framework:** A constitution establishes the core principles, institutions, and limits of government. It's the supreme law that guides all other laws and governance. **AI's first lie. A government constitution is absolutely in no way, shape, or form the "supreme law," as this can only be God's law to do no harm. Mind you, we do note they do tell a half-truth in that the constitution is in fact the supreme law only of government.**
- **More Than a Contract:** While it can be viewed as a kind of "social contract", it's not like a typical contract between parties with termination clauses or expiration dates. It represents a broad, often aspirational agreement among the people about how they will be governed. **It simply doesn't get any better than this. AI is telling you that both the Freemason 1901 Constitutions and the Fabian 1986 Constitutions are nothing but a social contract.**

Living or Static?: Some see a constitution as a "living document" meant to evolve through interpretation or amendment (like in the U.S.), while others see it as a fixed expression of founding values. Either way, its age alone doesn't determine its validity — its adaptability and legitimacy in the eyes of the public do. **AI is absolutely correct; when one makes a formal declaration in writing to terminate all government power of attorney to no longer be administered, then as far as the laws of Roman civics are concerned, one is no longer under government oversight.**

Moving off the voting rolls and rescinding benefits are both fundamental to abjure: one is no longer authorising their estate to be held as surety while acting in the office of trustee for the person. One is now returning to what a man was always born to be, and that is the free international sovereign state that all men are, along with one's God-given inalienable rights and dominion fully intact. Your allegiance is no longer to Rome's fake potentate kings or queens, who are all pagan Freemason druids, but only to your true God (the creator), owing only to him your rights and duties.

Legitimacy Over Time: If a constitution no longer reflects the will, needs, or realities of a people, it can lose legitimacy. So yes, questions of age matter — but only in the context of relevance and representation. In this instance, AI is absolutely correct and telling you in no uncertain terms that your will and your right to walk away from any such constitutional contract is absolutely acceptable, and knowing that abjuring must always be formally executed in writing and towards the correct and relevant government respondents. In Australia that office is administered by Craig MacLauchlan, who serves as the Deputy Secretary of the International Security, Legal, and Consular Group within the Department of Foreign Affairs and Trade (DFAT). In his role, he oversees areas including consular services, which encompass the Australian Passport Office. This is a vital role when dealing with international countries, as the deputy secretary must advise these countries of your legal personality and record it. It is the deputy secretary's responsibility to record your legal personality. As a national, you no longer occupy the office of the person, trustee, or state citizen because of your new amended legal status and standing.

In summary, while AI offers absolutely no benefits whatsoever to mankind, and considering that this subject is tackled and analysed correctly with facts and figures, there is then no doubt that in a short time to come this “Deliberate Dumbing Down Of America”, in the words of the late Charlotte Thomson Iserbyt, will continue to manifest in the decline of the cognitive thinking of mankind and will, at a very fast rate, lower the abilities related to learning, leading, and creating, and sadly highlight the fact that history really does repeat itself.

The British Municipal Venetian English Oligarchy and their hideous communist United Nations, homosexual Global One World Order of non-believers, is an unsettling reality before us, as we can only imagine their candlelight dinners on an alpine summit, either somewhere in New Zealand or Switzerland, while they toast each other celebrating our demise, watching the world drown in a toxic soup of PFAS, polyfluoroalkyl substances known as “forever chemicals,” Roundup, and Atrazine. And their favourite oldie, formaldehyde (used in the 50's and 60's for treatment in pregnant women), while these utterly psychopathic, mentally deranged LGBT-A-B-C-D homo-tran-sexuals enjoy dinner parties while happily toasting the Georgia Guide Stones prediction coming true before their very eyes, in between Stanley Kubrick's 2001: A Space Odyssey. This is now bubbling away under our feet and soon will consume us like that frog in the pan if we don't stop them at the pass.

Mikhail Gorbachev (1931-) General Secretary of the Communist Party of the Soviet Union, the last head of state of the USSR (1985-1991) in a speech to the Soviet Politburo, November 1987. “Gentlemen, comrades, do not be concerned about all you hear about Glasnost and Perestroika and democracy in the coming years. They are primarily for outward consumption. There will be no significant internal changes in the Soviet Union, other than for cosmetic purposes. Our purpose is to disarm the Americans and let them fall asleep.”

For the still-struggling constitutionalists, we have provided above for you to read with your own eyes that AI very happily tells you that any Commonwealth constitution is merely a commercial contract. For many, though, this will be a weight far too big to remove from their shoulders. Your laws are not written; they do not come from men before you to obey because they are inherent in you. *Cruden v. Neal*, 1796, is a testament to this. Their written laws are draconian and truly sinister, and if you fall into their trap and obey their statutes, acts, legislation, codes, regulations, municipal ordinances, and the like that they call law, then you are breaking your own law, God's law, and the "Covenant Man", and they know it . . .

Natural law theory (God's divine order) is one of the oldest and most significant philosophical doctrines, deeply rooted in the principles of morality and ethics. It asserts that certain rights and moral values are intrinsic to the nature of mankind and can be discerned through reason. According to Cicero, this universal law stemmed from nature and reason, making it accessible to all rational beings. **Thomas Aquinas**, a key figure in natural law theory, argued that natural law is a participation in the **eternal law of God**. This makes it sacred in his view.

From the HSBC East India Trading Company's fake Commonwealth and her constitutions, her illusory grip, her evil, and her far-reaching tentacles still digging into far too many of us today, let us consider Natural Law and The Science of Justice by Lysander Spooner.
